

# **HARMFUL SHARENTING IN THE UK**

**Briefing for Educators**

**Sharenting** is the practice of parents sharing images, stories, and other information about children, on social media. Schools, relatives, and guardians are also involved in the practice.

**The ProTechThem research project** brought together social and computer science expertise to investigate the risks of sharenting and identify harm prevention measures.

**The project surveyed a representative sample of over 1,000 UK parents** and found that current regulations, platform safety provisions, and parental cybersecurity measures do not sufficiently protect affected children from digital harm.

45%

**Prevalence:**

45% of UK parents practice sharenting

**Commonly used platforms:**

Facebook, Instagram, YouTube

**Harm rates:**

1 in 6 parents said that their children had experienced digital harm due to sharenting

**Risky practices related to parental reports of digital harm are:**

Weak cybersecurity measures devised by parents and frequent sharing.

**False sense of security:**

Parents overestimated the effectiveness of security settings provided by social media platforms

**School risk:**

Parents felt that schools were often less careful when sharing information (such as images and stories) of their children online.

**Poor cybersecurity awareness:**

Parents exhibited insufficient awareness of how social media properties such as the 'share' and 'tag' features enable unauthorised reshares of their posts about their children.

# Digital harms affecting children

**Identity Fraud**

**Identity Theft**

**Harassment**

**Cyberbullying**

**Contact by Strangers**

**Privacy Breaches**

# Recommendations for Educators

**Incorporate sharenting risk awareness into school ICT teaching.**

**Train teachers and parents on digital harms and privacy rights**

**Review school online sharing practices to minimise students' exposure to risk.**

The following digital resources which are freely available at the ProTechThem project's website ([www.protechthem.org](http://www.protechthem.org)), are based on the project's findings and can be used to support the above recommended practices:

- **The Sharenting Risk Awareness Checklist** [www.protechthem.org/sharenting-risk-awareness-checklist-srac-coming-soon](http://www.protechthem.org/sharenting-risk-awareness-checklist-srac-coming-soon)
- **The Sharenting Cyber Awareness Video** [www.protechthem.org/resources-2](http://www.protechthem.org/resources-2)
- **An open source user-friendly digital tool for detecting and deleting risky social media content about children** [www.protechthem.org/digital-resources](http://www.protechthem.org/digital-resources)

# Resources

This brief draws on interdisciplinary research funded by ESRC [ES/V011278/1] and conducted by researchers at social and computer science researchers at the University of Southampton and supported at various stages by external governmental and child safety partners: The UK's DCMS, KidScape, and The Age Check Certification Scheme.

If you've found this briefing useful or it has contributed to any changes to your policy and practice, please drop us a line at: [protechthem@outlook.com](mailto:protechthem@outlook.com). We greatly value your feedback.
